The commodification of life (including genetic material) is an ethical concern that most clearly arises directly from the application of patent law to higher life forms. The granting of a patent right in itself declares that an invention based on living matter has the potential to be commercialized.

Patenting life forms bring with them overbearing issues of religious and ethical values. In today ' s competitive and globalized world, biotechnology revolution is affecting industry and growth in a big way.

~~project: patents on life forms~~

The patenting of genes is a controversial issue in terms of bioethics. Some believe it is unethical to patent genetic material because it treats life as a commodity, or that it undermines the dignity of people and animals by allowing ownership of genes. Some say that living materials occur naturally, and therefore cannot be patented.
