Match each change with the effect it would have on the force of gravity between two objects. Change Effect 22.

The mass of one object doubles. 23. The mass of one object decreases by half.

File Type PDF Pearson Education Universal 24. Gravitation Answers

Chapter 13 Universal Gravitation

- The law of universal gravitation can be expressed in equation form: $F = G \frac{m_1 m_2}{d^2}$, where m_1 and m_2

File Type PDF Pearson Education Universal

are the objects' masses, and d is the distance between their centers of mass. • The universal gravitational constant, G , in the equation describes the strength of gravity. In scientific notation, $G = 6.67 \times 10^{-11}$

Exercises - MYP PHYSICS

law of universal gravitation states that every object in the universe attracts every other object. The strength

File Type PDF Pearson Education Universal

of gravity is measured in units called newtons, named after Isaac Newton. The strength of the force of gravity between two objects depends on two factors: the masses of the objects and the distance between them.
