Social movements have attracted much attention in recent years, both from scholars and among the wider public. This book examines the consequences of social movements, covering such issues as the impact of social movements on the life course of participants and the population in general, on political elites and markets, and on political parties and processes of social movement institutionalization. The volume makes a significant contribution to research on social movement outcomes in three ways: theoretically, by showing the importance of hitherto undervalued topics in the study of social movements outcomes; methodologically, by expanding the scientific boundaries of this research field through an interdisciplinary approach and new methods of analysis; and empirically, by providing new evidence about social movement outcomes from Europe and the United States.

Policing reveals much about rural society. It refers to the way that the police, the public and other agencies regulate themselves and each other according to the dominant ideals of society. This can be formally, through the ever-growing spectrum of policing partnerships in neo-liberal countries, or informally, through the performance and enforcement of moral codes and values. This book draws on international inter-disciplinary perspectives to examine the range and consequences of policing across different rural localities. Rural Policing and Policing the Rural is organised into two sections: the first examines who is policing rural areas, while the second examines the nature of rural policing by considering, on the one hand, the policing of rural space and, on the other, how ideas of rurality are regulated. In doing so this book provides a survey of rural policing that will be valuable to academics, students, policy makers and those policing rural places.

In Policing Protest Paul A. Passavant explores how the policing of protest in the United States has become increasingly hostile since the late 1990s, moving away from strategies that protect protesters toward militaristic practices designed to suppress protests. He identifies reactions to three interrelated crises that converged to institutionalize this new mode of policing: the political mobilization of marginalized social groups in the Civil Rights era that led to a perceived crisis of democracy, the urban fiscal crisis of the 1970s, and a crime crisis that was associated with protests and civil disobedience of the 1960s. As Passavant demonstrates, these reactions are all haunted by the figure of black insurrection, which continues to shape policing of protest and surveillance, notably in response to the Black Lives Matter movement. Ultimately, Passavant argues, this trend of violent policing strategies against protesters is evidence of the emergence of a post-democratic state in the United States.

Policing Transnational Protest offers an original perspective on the history of police surveillance of anticolonial activists in France, Britain, and Germany in the first half of the twentieth century. Tracing the undertakings of anticolonial activists from Asia, Africa, and the Middle East in Europe and reconstructing the reaction of European governments, it illuminates the increasing cooperation of the police and secret services to monitor the activities of the "oriental revolutionaries" and curb their room to maneuver. But those efforts had an unintended inflammatory effect, provoking both supporters and opponents of colonial rule to understand the conflict in increasingly global and trans-imperial terms. The surveillance also exacerbated tensions between Europeans friendly to the anticolonial cause, and those who prioritized imperial security over civil liberties and national sovereignty. Tracking growing levels of transnational government cooperation against anticolonialists, this book pays special attention to Germany, where many activists were able to carry out their political work in relative safety after escaping surveillance in Britain and France. By analyzing the emergence of ever more sophisticated counter-terrorism schemes and surveillance apparatuses, Brückenhaus also contributes a pre-history of similar phenomena characterizing the post-9/11 world. He shows how, then as now, an intensification of a "war on terror" went hand in hand with concerns about encroachments on civil liberties, often expressed in open protest against such governance measures. Policing Transnational Protest informs current debates about intelligence gathering and surveillance in several European countries as well as their new cooperative partner, the United States.

This book is the essential guide for understanding how state power and politics are contested and exercised on social media. It brings together contributions by social media scholars who explore the connection of social media with revolutions, uprising, protests, power and counter-power, hacktivism, the state, policing and surveillance. It shows how collective action and state power are related and conflict as two dialectical sides of social media power, and how power and counter-power are distributed in this dialectic. Theoretically focused and empirically rigorous research considers the two-sided contradictory nature of power in relation to social media and politics. Chapters cover social media in the context of phenomena such as contemporary revolutions in Egypt and other countries, populism 2.0, anti-austerity protests, the fascist movement in Greece's crisis, Anonymous and police surveillance.

Bringing together researchers from a variety of disciplines, this volume examines developments in the policing of transnational protest since the late 1990s. Using case studies from a number of countries in North America and Europe, the authors examine the new forms of political protest and the manner in which the authorities have reacted.

Protest and political violence are concerns of global importance in the twenty-first century. This dictionary brings together in one comprehensive volume a number of key issues relating to the conduct of protest and political violence and the response of the state and police to such activities.
