Industry, Powered By The Sun Creating the tons of steel and concrete we use to build our world requires a massive amount of heat—and most of it comes from burning dirty fossil fuels.

Industry, Powered By The Sun

The house, and hence a good portion of the business, are 100% powered by the sun using a few solar panels and a solar "caddy" that shelters all of the electrical equipment and battery bank. It generates enough watts to meet all of my living and office needs, and sometimes there is enough left to operate power tools.

95% of energy powered by solar. Andy Heathcoat-Marks, Director at 1Energy, says the business was uniquely positioned to deliver this pioneering energy project, having a strong track-record of successful projects in far flung regions throughout Africa and the Indian Ocean for almost a decade. "1Energy is a registered Tesla 3rd party installer. This means we are one of the few African companies to be sanctioned by Tesla to purchase and install their systems."

Powered by the sun. To Karsten Hillmann, CEO of Solar Polaris, sustainability is a take on life rather than a business discipline. One of the largest solar contractors in Scandinavia, Solar Polaris is a service company with a unique approach to promote solar energy to their mainly Scandinavian audience. With a major focus on solid project management, they plan, implement and service professional solar installation, driven by an ambition to accelerate the green transition for a greater good.

CEO Karsten Hillmann of Solar Polaris is powered by the ...

Solar power —the conversion of sunlight into electricity —is yet another application of solar technology. This can be done in a number of ways. The two most common are photovoltaic (solar cells) and concentrating solar power. Solar cells convert sunlight directly into electricity.
