word "python" and you may well get the result you need.

Python For Beginners | Python.org

Since there are 9 elements in our list ([0] through [8]), attempting to access my_list[9] throws an IndexError: list index out of range, since it is actually trying to get the tenth element,

Download Ebook Python

and there isn't one.

Python also allows you to index from the end of the list using a negative number, where `[-1]` returns the last element.

This is super-useful since it means you don't have to programmatically find out the length of the iterable in order to work with elements at the end of it.
