## ~~Research Trials — Psoriasis~~

Learn how clinical trials are paving the next generation of psoriatic disease  
treatments and how you can participate in a trial. Clinical trials play an important  
role in informing researchers and health care providers about how a new treatment  
may improve the health of those living with psoriatic disease. Along with providing

# Access Free Research Studies In Psoriasis

support for research, participating in a clinical trial also offers you access to new treatments and extra time with health care providers.

## ~~Clinical Trials: National Psoriasis Foundation~~

Analysis of Inflammation in the Vitiligo and Other Inflammatory Skin Diseases: Psoriasis, Atopic Dermatitis and Alopecia Areata. It is a study of translational research with mechanistically objectives and including biological samples of patients with chronic inflammatory disorders. 18 Years - 75 Years. [Learn More.](#)

## ~~Clinical Trial Finder—Psoriasis Foundation~~

Psoriasis is an autoimmune disease that appears on the skin. It occurs when the immune system regards the skin cells as a pathogen and sends out faulty signals that speed up the growth cycle of skin cells. Psoriasis is not contagious and typically develops as patches (plaques) of red, scaly skin.

## ~~Psoriasis Trials—Ongoing Paid Clinical Trials~~

The drug ustekinumab (Stelara) has been used to treat psoriasis since 2009. It blocks two proteins related to inflammation: interleukin-12 (IL-12) and interleukin-23 (IL-23). But recent studies...
