The Imperial Russian Navy (Russian: Императорский Российский флот) was the navy of the Russian Empire from 1696 to 1917. It was formally established in 1696 and lasted until being dissolved during the February Revolution of 1917. It developed from a smaller force that had existed prior to Tsar Peter the Great's founding of the modern Russian Navy during the Second ...

Pavel headed back to Russia in October with news of the land they had found. In November Bering's ship was wrecked on Bering Island. There Bering fell ill and died, and high winds dashed the Sv. Petr to pieces. After the stranded crew wintered on the island, the survivors built a boat from the wreckage and set sail for Russia in

August 1742.

A fascinating memoir of an extraordinary sailing adventure. The Baltic Millennium Rally was organised by the Cruising Association in the year 2000, which saw Irene and her husband Gordon circumnavigate Scandinavia in their boat Fereale. A journey which took them through the inland waterways of Russia's North and back via North Cape and Norway.

Peter the Great created the Russian navy from nothing, but it soon surpassed Sweden as the Baltic naval power, while in the Black Sea it became an essential tool in driving back the Ottoman Turks from Europe. During the 18th century it was the third largest navy in the world yet its history, and especially its ships, are virtually unrecorded in the West. The first comprehensive study in English, it is illustrated with plans, paintings, and prints rarely seen outside Russia.

A rich and fascinating exploration of the Volga--the first to fully reveal its vital place in Russian history The longest river in Europe, the Volga stretches over three and a half thousand km from the heart of Russia to the Caspian Sea, separating west from east. The river has played a crucial role in the history of the peoples who are now a part of the Russian Federation--and has united and divided the land through which it flows. Janet Hartley explores the history of Russia through the Volga from the seventh century to the present day. She looks at it as an artery for trade and as a testing ground for the Russian Empire's control of the borderlands, at how it featured

in Russian literature and art, and how it was crucial for the outcome of the Second World War at Stalingrad. This vibrant account unearths what life on the river was really like, telling the story of its diverse people and its vital place in Russian history.

Peter the Great created a navy from nothing, but it challenged and soon surpassed Sweden as the Baltic naval power, while in the Black Sea it became an essential tool in driving back the Ottoman Turks from the heartland of Europe. In battle it was surprisingly successful, and at times in the eighteenth century was the third largest navy in the world - yet its history, and especially its ships, are virtually unrecorded in the West. This major new reference work handsomely fills this gap, with a complete and comprehensive list of the fleet, with technical detail and career highlights for every ship, down to small craft. However, because the subject is so little recorded in English, the book also provides substantial background material on the organisation and administration of the navy, its weapons, personnel and shipbuilding facilities, as well as an outline of Russia's naval campaigns down to the clash with Britain and France known as the Crimean War. Illustrated with plans, paintings and prints rarely seen outside Russia, it is authoritative, reliable and comprehensive, the culmination of a long collaboration between a Russian naval historian and an American ship enthusiast. EDUARD SOZAEV is an established Russian naval historian with a number of books to his credit. JOHN TREDREA, his translator, editor and long-term collaborator, is an American ship enthusiast with a life-long interest in the Russian navy.

In the bestselling tradition of Hampton Sides's *In the Kingdom of Ice*, a riveting and cinematic tale of Dutch polar explorer William Barents and his three harrowing Arctic expeditions—the last of which resulted in a relentlessly challenging year-long fight for survival.

The human story has always been one of perseverance—often against remarkable odds. The most astonishing survival tale of all might be that of 16th-century Dutch explorer William Barents and his crew of sixteen, who ventured farther north than any Europeans before and, on their third polar exploration, lost their ship off the frozen coast of Nova Zembla to unforgiving ice. The men would spend the next year fighting off ravenous polar bears, gnawing hunger, and endless winter. In *Icebound*, Andrea Pitzer masterfully combines a gripping tale of survival with a sweeping history of the great Age of Exploration—a time of hope, adventure, and seemingly unlimited geographic frontiers. At the story's center is William Barents, one of the 16th century's greatest navigators whose larger-than-life ambitions and obsessive quest to chart a path through the deepest, most remote regions of the Arctic ended in both tragedy and glory. Journalist Pitzer did extensive research, learning how to use four-hundred-year-old navigation equipment, setting out on three Arctic expeditions to retrace Barents's steps, and visiting replicas of Barents's ship and cabin. "A visceral, thrilling account full of tantalizing surprises" (Andrea Barrett, author of *The Voyage of the Narwhal*), Pitzer's reenactment of Barents's ill-fated journey shows us how the human body can function at twenty degrees below, the history of mutiny, the art of celestial navigation, and the intricacies of building shelters. But above all, it gives us a first-hand glimpse into the true nature of human courage.

The Arctic is the newest sphere of international competition for energy and security access. It pits Russia against the other Arctic states. These essays fully explore and analyze what is at stake here and what Moscow has done to increase its capability and influence in the Arctic.
