SAP enterprise structure is organizational structure that represents an enterprise in SAP ERP system. It consists of some organizational units which, for legal reasons or for other specific business-related reasons, are grouped together. Organizational units include legal company entities, sales offices, profit centers, etc. Organizational units handle specific business functions. Organizational units may be assigned to a single module (such as a sales organization is assigned to Sales and Distribution (SD) module, or to several modules (such as a plant is assigned to Materials Management (MM) and Production Planning (PP) module). SAP ERP system can represent a complex enterprise structure. Enterprise structure design is a fundamental process in a SAP implementation project. The design is mainly determined by the business scenarios performed in an enterprise. Once the design is determined, it will affect many things such as how to perform a transaction and generate reports on SAP system. Although it's possible, it requires great effort to change the enterprise structure. So, we must ensure that the enterprise structure designed in the SAP implementation project can accommodate all business scenarios and enterprise's requirements for current and future situation. The SAP Enterprise Structure is a fundamental setting and needs a comprehensive

# Read Book Sap Mm Configuration Guide

understanding of the business processes and their integration. We have to work with other departments and SAP modules, such as Accounting department (FI), and Sales department (SD). This book explains in details about the basic concept of SAP Enterprise Structure (MM and related modules such as FI, Logistics, and SD) and step by step how to configure it in SAP ERP system. To make it more understandable, it is supplied with a case study and the screen shots of each configuration step. It's written in a simple-to-understand way, so you can learn it easily. You don't need to have extensive SAP configuration skill and experience to be able to configure the SAP Enterprise Structure.

Designed as a comprehensive reference for programmers and SAP users or as review for certification, this book includes all of the major concepts related to the SAP Materials Management (MM) module functionality, technical configuration, and implementation. With an easy-to-follow writing style, it begins with an introduction of the SAP ERP system and extends to the architecture of SAP R/3 technology. A complete glossary is included to help the reader understand the myriad of terms used with this module. This book serves as an excellent reference for both the earlier and more recent versions of SAP software.

Materials management has transitioned to SAP S/4HANA--let us help you do the same! Whether your focus is on materials planning, procurement, or inventory, this guide will teach you to configure and

# Read Book Sap Mm Configuration Guide

manage your critical processes in SAP S/4HANA. Start by creating your organizational structure and defining business partners and material master data. Then get step-by-step instructions for defining the processes you need, from creating purchase orders and receiving goods to running MRP and using batch management. The new MM is here! Material master data Business partner master data Batch management Purchasing Quotation management Material requirements planning (MRP) Inventory management Goods issue/goods receipt (GI/GR) Invoicing Valuation Document management Reporting

Introduces sales and distribution, the newest module in the SAP R/3 system, explaining how to use the module to manage the sales process with its online competitor data, sales activities tracking, order entry, automatic billing, and other key features. Original. (Intermediate)

Revised edition of the authors' Procurement with SAP MM, 2014.

Find out how to get the very most from your SAP MM implementation with this completely updated, comprehensive guide to SAP Materials Management (MM). Based on SAP ERP 6.0, this new edition of our bestseller provides you with a thorough understanding of how MM works and integrates seamlessly with your other SAP components. All of the important new aspects related to SAP ERP 6.0 are covered in detail, along with essential insights on Material Master Data, Purchasing, and Inventory Management. Crucial 'touchpoints' with other components, such as PP, SD, QM, and FI are covered as well. And, a number of cross-

# Read Book Sap Mm Configuration Guide

application issues, such as document management, batch management, and classification are explained in detail. In addition, you'll learn how MM can enhance your own expertise, and find out how to make software application decisions by exploring the functionality and technical configuration issues that must be considered. By reading this book, you'll understand the entire breadth of SAP MM, while you boost your skills and abilities to leverage MM functionalities in your daily work. Highlights Include: \* Material Master Data \* Vendor Master Data \* Purchasing Information Data \* Material Master Records \* Purchase Requisitions \* Requests for Quotations \* External Services Management \* Inventory Management \* Goods Issue

For most SAP MM end-users or SAP MM learners, Purchase Requisition (PR) release strategy is a 'black box' process. Many of them don't understand that topic and get frustrated because there is no good documentation about it. This book explains the basic concept of PR Release Strategy and step by step guide how to configure it on SAP ERP system. To make it more understandable, it is supplied with a case study and the screen shots of each configuration step. The book is written in a simple-to-understand way, so anyone can learn it easily. You don't need to have extensive SAP configuration skill or experience to be able to configure it. In addition, the book also contains extra section which explains in details about purchasing process (procurement cycle) in SAP ERP. It explains Determination of Requirements (SAP PR document in details), Determination of Source of Supply, Vendor Selection, Purchase Order (PO) Processing, and PO Monitoring processes.
