Science Instruction in the Middle and Secondary Schools 5th Edition by Eugene L. Chiappetta and Thomas R. Koballa, Jr.; Merrill/Prentice Hall; © 2002, 337 pages softcover. This is a continuation of this title since its first edition in 1959, and the last edition before the imposition of No Child Left Behind standardization begun in 2001 but not fully in effect.

Amazon.com: Science Instruction in the Middle and ...

Chapter 4 on Learning in Middle Grades and Secondary Schools begins with an appeal to use the latest research on “learning science” but that supposed science ephemeral, lacks a paradigm, and has a track record of failure. Indeed, education is rightly accused of having amnesia, forgetting what does work and repeating what did not work.

This science methods textbook is designed to prepare middle and high school science teachers to help students become scientifically and technologically literate by first helping them understand the National Science Standards and other elements of science reform and then supporting their efforts.

Chiappetta & Koballa, Science Instruction in the Middle ...

The Next Generation Science Standards (NGSS) are K–12 science content standards. Standards set the expectations for what students should know and be able to do. The NGSS were developed by states to improve science education for all students. A goal for developing the NGSS was to create a set of research-based, up-to-date K–12 science standards.

Next Generation Science Standards

A middle school life science curriculum teaches students a number of important concepts pertaining to cells and heredity, the five kingdoms, human body systems, and ecology. Students will start the year by going over various principles crucial to any science study including scientific inquiry, hypotheses and analyzing data.

Middle School Life Science Curriculum | Time4Learning

NSTA recommends the curriculum of middle level science programs. be aligned with the disciplinary core ideas, crosscutting concepts, and science and engineering practices outlined in A Framework for K–12 Science Education; nurture curiosity about the natural world and include opportunities to engage in science and engineering practices;

Science Education for Middle Level Students | NSTA

Project-based science is also discussed here amidst STS issues, but has since grown into another cure-all for science teaching, an attempt to make science relevant today. STS curricular are briefly described. The rest of the chapter steps through the evolution versus creationism controversy up to 2001.
