This book is a clear, practical, and self-contained guide to inventory management. It describes recent thinking about stocks and the methods for their control, developing the subject from basic principles through to higher level materials and newer developments. It does not assume any previous knowledge of the subject, nor of any other specific field such as management, operations, mathematics, or accounting. The Second Edition has been completely rewritten to improve the clarity and flow of the text, and includes a host of new information, examples, and support materials.* Stocks and Inventories* Stocks within an Organisation* Economic Order Quantity * Models for Known Demand* Models for Uncertain Demand* Sources of Information * Forecasting Demand * Material Requirements Planning* Just-in-Time

This book covers a wealth of knowledge from experts and informed stakeholders on the best ways to understand, prevent, and control fall-related risk exposures. Featured are subjects on: (1) a public health view of fall problems and strategic goals; (2) the sciences behind human falls and injury risk; (3) research on slips, trips and falls; (4) practical applications of prevention and protection tools and methods in industrial sectors and home/communities; (5) fall incident investigation and reconstruction; and (6) knowledge gaps, emerging issues, and recommendations for fall protection research and fall mitigation.

Handbook to Happiness counsels hurting people by teaching them to exchange their life for Christ's. Instead of "trying to live the Christian life," which still centers on our own efforts, we need to allow Christ to live his life in us. This removes all reliance on human effort and frees us to become totally Christ centered. This revision includes personal testimonials, diagrams, and a poem by the author, illustrating his own spiritual and emotional journey.

A bestseller for professional machinists and metalworkers that also has a large following in the home shop, do-it-yourself niche.

Our working conditions have undergone rapid and fundamental changes during the last few years. One example is the widespread use of the individual computer in the shop, office and home. Another major development is that women now hold many jobs that used to be in the male domain, and that many more women choose a life-long occupational career. Workforces, tasks, conditions and tools are changing. Many office and industrial workers are tied to human-machine systems. Repetitive work can create cumulative health problems such as the often reported visual strains, mental stress and physical injury. Proper ergonomic measures can avoid such harmful effects and instead promote health conditions which are both efficient and agreeable. In this latest edition of Fitting the Task to the Human, Professor Karl Kroemer has revised and updated the text and data while remaining true to the spirit of Professor Etienne Grandjean's earlier editions. This aim is, as before, to impart basic knowledge of occupational ergonomics in a straightforward and lucid fashion to those responsible for the design, management and safety of people in the workplace, and to those who study it.

Note: If you are purchasing an electronic version, MasteringChemistry does not come automatically with it. To purchase MasteringChemistry, please visit www.masteringchemistry.com or you can purchase a package of the physical text and MasteringChemistry by searching for ISBN 10: 0133070522 / ISBN 13: 9780133070521. The most successful general chemistry textbook published in 30 years is now specifically written for Canadian students. This innovative, pedagogically driven text explains difficult concepts in a student-oriented manner. The book offers a rigorous and accessible treatment of general chemistry in the context of relevance. Chemistry is presented visually through multi-level images—macroscopic, molecular and symbolic representations—helping students see the connections among the formulas (symbolic), the world around them (macroscopic), and the atoms and molecules that make up the world (molecular). Chemistry: A Molecular Approach, First Canadian edition offers expanded coverage of organic chemistry, employs SI units, and brings the text in line with IUPAC conventions. This first Canadian edition is accompanied by Pearson's MasteringChemistry, the most advanced, most widely used online chemistry tutorial and homework program in the world. If you are purchasing an electronic version, MasteringChemistry does not come automatically packaged with the text. To purchase MasteringChemistry, please visit: www.masteringchemistry.com or you can purchase a package of the physical text + MasteringChemistry by searching for ISBN 10: 0133070522 / ISBN 13: 9780133070521.
