Honda performance enthusiasts all have one basic question when it comes to making their cars faster: "What parts work, and what parts don't?" The only way to answer that question is to install various parts on a car and test the power output on a dynamometer (dyno). Richard Holdener has done that in High Performance Honda Dyno Tests. Holdener's extensive testing provides dyno-proven data for all popular Honda performance parts, from air intake systems to exhausts, cams and cylinder heads to nitrous, turbos, and superchargers. There is even a chapter on engine build-ups. In addition, dyno tests on nearly every Honda model, from the single-cam DX to the 2.2L Prelude, are included. Acura models are covered as well, from the 1.8L LS through the GSR and Type R all the way up to exotic NSX. There is no better place to find performance answers than in this book.

Since 1957, more than 45 African countries have received aid from China, yet until recently little has been known about the effectiveness or impact of this assistance. Br ä utigam provides the first authoritative account of China's experience as an aid donor in rural Africa. In a detailed and highly readable analysis, the author draws on anthropology, economics, organization theory and political science to explain how China's domestic agenda shaped the design of its aid, and how domestic politics in African countries influenced its outcome.
