Identifies the nature of well-being through analysis of in-depth interviews with Indians on what good life means to them This book explains well-being through insights gathered from qualitative interviews with Indians from different walks of life. It shows that well-being is mixed and transient, shifting in interactions. It reveals the universals that lead to well-being, bringing out interlinkages between health, wealth, and pleasure. Explaining variations by gender, class, age, and individual choice, the book highlights the distinctive insights in Indian religious traditions about life satisfaction.

Sociological Traditions book looks at the sociology of India from two perspectives: first, understanding the cultural traditions of India with special reference to religious and ethical values; and second, exploring the growth of the sociological traditions of India. Divided in two parts, the book goes beyond mere description of the main religious traditions and looks at the ethical values that are embedded in the religio-secular traditions of India. It also projects the sociological traditions of India as a historical process, a process of growth of sociological knowledge. The basic premise of the discussion is not one dominant cultural tradition but the plurality that characterizes the cultural, religious and value traditions of India, and pluralism that characterizes the sociology of India.

It is through the contributions of the pioneering scholars that not only a particular discipline derives its name but also the foundations on which a particular discipline is built and grows. G.S. Ghurye (1893-1983), Radhakamal Mukerjee (1889-1968), D.P. Mukerji (1894-1961) and M.N. Srinivas (1916-1999) are known as the pioneers of sociology in India. It is mainly on them and on their contributions that the contemporary sociologists in India have extensively published in the issues of the Sociological Bulletin. Volume 10, Pioneers of Sociology in India, contains a selection of papers that have been published since 1977 on these founding fathers of Sociology in India.

This book critically examines current workplace diversity management practices and explores a nuanced framework for undertaking, supporting, and

implementing policies that equally favor all people. It presents critical perspectives that not only elevate respect for differences but also provide insights into the nature and dynamics of differences in view of an inclusive and truly participative organizational environment. The book first presents a brief overview of the connotations associated with workplace diversity and its effective management. Next, it focuses on the organizational appropriation of differences through the formation and mediation of various diversity discourses. It demonstrates the particular articulations of these discourses with inequality and oppressive structures that perpetuate structural disadvantage due to existing power disparity between dominant and unprivileged group members. The book then goes on to underscore the need of constructing relational and context-sensitive diversity management frameworks. Overall, the book outlines that current business cases for diversity focus solely on instrumental goals and tangible outcomes and, as a result, fail to fully capture the complexity as well as the particularity of the diversity phenomenon. The book underlines the necessity for a more inclusive paradigm, implying a progressive problem-shift in the dominant diversity research agenda from a market-driven business-oriented diversity management to one highly valuing, affirming, and respecting otherness.
