Blast off on an exploration of our solar system--a fun space book for kids 3 to 5 Get even the smallest astronomer excited for the big universe of space, from the bright and burning sun to our own blue Earth to ice-capped Pluto and every planet in between. With this book, kids will explore the entire solar system through incredible photos and fascinating facts on what makes each planet so special--like their size, distance from the sun, what the surface is like, how many moons they have, and more! This planets for kids book includes: Big, beautiful images Vibrant photos will take kids deep into space and onto each planet no telescope required. Astronomy for kids Learn all about the eight planets in our solar system, plus dwarf planets Ceres, Pluto, Eris, Haumea, and Makemake. Fun space facts Did you know the bubbles in soda are the same gas that's on Venus? Out of this world facts will keep kids glued to the page and excited to explore the sky. Show kids the amazing universe that surrounds them with this fun and engaging astronomy book.

Take a guided tour of the galaxy--blast off with the Junior Explorer series Space is limitless--just like your imagination! Get ready to take an amazing journey to the stars. Solar System for Kids is filled with fascinating facts, photographs, and illustrations that'll excite your mind and charge your curiosity. Among solar system books for kids 6-8, this one teaches you about the birth of the universe and how scientists believe galaxies, stars, and planets came into being. Explore the sun, planets, dwarf planets, moons, and the asteroid belt in one of the most engaging solar system books for kids. This standout among solar system books for kids offers tips for spotting constellations, planets, comets, and more--from your backyard. From navigating the night sky to learning about objects billions of miles away, this book answers curious kids' big questions about the universe. Strap in, Junior Explorer. 3, 2, 1... blastoff! One of the most outstanding solar system books for kids includes: Universally easy--Explore the whole universe with in-depth and easy-to-follow information. Deep space knowledge--From dark matter and black holes to eclipses and moon landings, one of the coolest solar system books for kids explores every aspect curious kids want to know. Bonus material--Discover even more fun information by using the extensive glossary, sidebars, and in-book activities. If you've been searching for solar system books for kids, look no further--this one has you covered.

In this stellar activity book, kids delve into the rich history of space exploration, where telescopes, satellites, probes, landers, and human missions lead to amazing discoveries. Updated to include the recent discovery of Eris which, along with Pluto, has been newly classified as a & " dwarf planet& " by the International Astronomical Union, this cosmic adventure challenges kids to explore the planets and other celestial bodies for themselves through activities such as building a model of a comet using soil, molasses, dry ice, and window cleaner; or creating their own reentry vehicle to safely return an egg to Earth's surface. With biographies of more than 20 space pioneers, specific mission details, a 20-page field guide to the solar system, and plenty of suggestions for further research, this is the ultimate guidebook to exploring the solar system.

The Solar System is an incredible neighborhood centered around one very important star called the Sun. Discover the many amazing objects that call the Solar System home! In this simple Solar System book for kindergarten and first grade, kids are introduced to basic space concepts that are made easy to follow and remember. Starting at the Sun and working outward through the planets and belts, children will discover space objects and follow the flow of the solar wind, taking a fun and informative tour of the Solar System. Both boys and girls ages 5-8 will love the bright, colorful images of the planets and objects brought to life as characters, making learning more enjoyable and engaging. Kids will enjoy learning facts with the imaginatively illustrated Sun and planets that help build a love of learning while simultaneously presenting educational and scientific facts. Large print and easy to follow information tell all about the solar system for kids at preschool level learning. Travel the Solar System in an imaginary spaceship that tours the planets, and both belts, all the way to where the Solar System ends, and interstellar space begins. How many planets are in the Solar System? What type of planets are they? What happens to the solar wind? Have any spacecraft made it out of the Solar System? Where does the Solar System end? Find the answer to these questions and many more. I Am the Solar System is an excellent book for preschoolers, kindergarteners, and first graders just beginning to understand the basic concepts of the Solar System they are part of.I Am the Solar System, along with the numerous other books in the I Am series are a great addition to the Montessori method of teaching. The I Am series is geared toward scientific learning and independent thought. An excellent companion for Montessori classroom activities and as a stand alone read aloud.

Learn about the eight planets and the Solar System through fun facts and adorable illustrations. Each planet is depicted as a fun character which reveals interesting space facts about itself. An educational picture book ideal for young children who want to learn about the planets and space. The ideal learning book for toddlers, children in preschool, kindergarten or a higher grade, for ages 2 through to 7.

Simple concepts about up-and-coming science and technology to kick-start your future genius! Solar System for Babies & Toddlers is a great way to introduce basic concepts about space, our solar system, and beyond. With interplanetary travel a real possibility for the next generation, this book will launch your little one on an out of this world adventure! The colorful, beautiful, and visually stimulating illustrations encourage the child's sense of wonder and adventure (and might stimulate your senses too)!
