Theology Personal Statement. Richard Dawkins once remarked that he 'couldn't see how theology is a subject at all'. But embedded in humanity is the universal conception of a Supreme Being, and the existential quest to uncover the obscurity of our origins, and lift the veil of the future. Theology nurtures this instinct, and by grappling with the most critical questions of purpose, provenance and existence, arguably transcends all other realms of enquiry.

Varieties of Personal Theology starts from the premise that all human beings are folk theologians, active not only in constructing selves but also in constructing worlds and guiding philosophies of life. Through fascinating in-depth interviews and surveys, David Gortner looks specifically at 'emerging adults' (aged 18-25) as young theologians who, regardless of religious background, wrestle with fundamental questions of place, purpose, ultimate cause, and ultimate aims in life. This book charts the subtle and significant influences of social class, family, school, work, peer relationships, religion, and intrinsic attitudes and dispositions on young adults' personal theologies, and traces the ways their

personal theologies connect with choices they make in their daily lives - in education, jobs, leisure, and relationships. Intentionally crossing boundaries between religious and social science fields, Gortner combines perspectives from both to demonstrate how theological diversity persists in America despite some clear culturally dominant trends. This book reveals how American young adults are active theologians forging diverse ways of seeing and being in the world - shaped by their experiences and in turn continuing to shape their choices in life.

This book deals with the effect that translation of the Bible has had on the theology of developing churches over the past 200 years, and also examines cultural factors which affect translation, as well as how Bible translation itself affects a people's social and cultural development.

With clarity and passion, award-winning teacher, author and theologian Neil Gillman captures the power of Jewish theological claims and reveals extraordinary insights into Jewish identity, the purpose of religion and our relationship with God.

Bringing together contributions from established scholars as well as promising younger academics, the seventeenth volume of this established series offers a broad-ranging view of why Judaism, a religion whose observance is more honored in the breach in most western Jewish communities, has garnered attention, authority, and controversy in the late twentieth century. The volume considers the ways in which theological writings, sweeping social change, individual or small-group needs, and intra-communal diversity have re-energized Judaism even amidst secular trends in America and Israel.

A unique historical study of the personal nature of religion, spirituality, and healing in the twentieth century based on the letters of ordinary people from around the world. The Panacea Society was a small religious community of women that was established in England in the early twentieth century. They followed the early nineteenth-century mystic Joanna Southcott, as well other emerging spiritual movements of the day, and developed a remarkable spiritual healing practice that spread around the world. Based on the thousands of letters held in the Society's healing archive, which were sent by ordinary people from around the world, Alastair Lockhart offers a detailed study of the religious ideas of religious seekers from the 1920s to the 1970s. Focusing on Great Britain, Finland, Jamaica, and the US, Lockhart provides unique insight into the personal nature of spirituality in recent times and how ancient and modern spiritual strands were harnessed to the needs of late-modern spiritual seekers. This book addresses debates about the complexity and meaning of the rise or decline of religion in the twentieth century and the processes involved in the formation of popular nontraditional spiritualities. It informs our understanding of global and transnational religions and recent forms of spiritual healing. At the University of Cambridge, Alastair Lockhart is Affiliate Lecturer in the Faculty of Divinity and a Fellow of Hughes Hall.

This is a print on demand book and is therefore non-returnable. This book deals with the epistemological problems of rationality and of theory construction in theology. Van Huyssteen analyzes the principal models of rationality, examines the conceptual models of Wolfhart Pannenberg and Gerhard Sauter, and finally discusses the metaphoric nature of religious language and develops criteria for the structuring of a "critical-realist rationality model."
