In this groundbreaking book, Tim Harford, the Undercover Economist, shows us a new and inspiring approach to solving the most pressing problems in our lives. When faced with complex situations, we have all become

accustomed to looking to our leaders to set out a plan of action and blaze a path to success.

Harford argues that today's challenges simply cannot be tackled with ready-made solutions and expert opinion; the world has become far too unpredictable and profoundly complex. Instead, we must adapt.

Deftly weaving together psychology, evolutionary biology, anthropology, physics, and economics, along with the compelling story of hard-won lessons learned in the field, Harford makes a passionate case for the importance of adaptive trial and error in tackling issues such as climate change, poverty,

Everyone talks about  
success. Don't you think  
it's kind of boring, kind

That's the true story of my life, which led me from India to England and to Germany where I live now. While my stupid mistakes will make you laugh, you'll understand what I learned about dealing with risks, fear

and failure. And why I  
stopped lying. Nothing  
is made up in this book,  
I'll be completely honest  
with you. I promise.
