~~An ASCD Study Guide for Teaching with the Brain in Mind ...~~

The classroom tantrum is similar to the toddler's shopping centre tantrum in that both can be viewed as an event of the brain, a massive cortisol discharge, so that the teen can return to a calmer state. The feel-good brain chemicals of serotonin, dopamine and endorphins are very difficult for adolescents to be able to create on their own.

In accordance with connectionism, reading in the brain is a self-teaching system. Once the brain has learnt to read a word, it can use this knowledge to read new words. The brain quickly learns which words look right and which words need to be checked in a dictionary. The self-teaching function of the brain means that once the correct circuits are in place, the brain continues to reinforce these circuits, making them stronger.
