As of September 2016, 36 CU TRs have been developed covering different ...

This edition of Importing Into the United States contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.

The Law Library presents the complete text of the Electronic Information for Cargo Exported From the United States - Technical Amendments (US Customs and Border Protection Bureau Regulation) (USCBP) (2018 Edition). Updated as of May 29, 2018 This final rule amends U.S. Customs and Border Protection regulations regarding the requirements to provide data for certain exported cargo to conform to current requirements. Various CBP regulations regarding exported cargo refer to outdated regulations or requirements of the U.S. Census Bureau, including the requirement to submit a paper Shipper's Export Declaration (SED). The U.S. Census Bureau's Foreign Trade Regulations (FTR) have been amended to eliminate the SED and to require that the information that was previously provided on the paper SED be filed electronically through the Automated Export System. This rule amends the CBP regulations to incorporate the current requirements. The rule also makes related conforming changes as well as non-substantive editorial and nomenclature changes. This ebook contains: - The complete text of the Electronic Information for Cargo Exported From the United States - Technical Amendments (US Customs and Border Protection Bureau Regulation) (USCBP) (2018 Edition) - A dynamic table of content linking to each section - A table of contents in introduction presenting a general overview of the structure

Evaluating the importance of non-tariff measures (NTMs) affecting imports remains a major challenge. This study reports evidence on the prevalence of NTMs based on an inventory of business complaints. This data source has the advantage of drawing on experiences of economic agents that are directly involved in trading activities, of containing information on quote;behind the border measuresquote;; and of covering procedural aspects of NTMs. The results suggest that natural resource based industries, such as agriculture and food, mining, and textiles, are most strongly affected by NTMs relative to their export volumes. Certification procedures, quantity control measures, and technical regulations are the types of NTM most frequently complained about. Complaints about domestic governance practices, such as impediments related to government procurement, investment restrictions, or insufficient intellectual property rights protection account for almost a third of all NTM observations and are in most cases not sector-specific, but of a general nature. These complaints are frequently associated with discriminatory practices or inappropriate regulations, while delays and obstructions are repeatedly mentioned in relation to customs and certification procedures and technical regulations. In any case, the findings in this study should be interpreted with care, as frequency ratios are sometimes poor indicators of the economic and trade effects that result from NTMs.
