□ Container candles. Dipping Dipping is the simplest method of making candles. It can be used to make a small number of candles by hand, with very simple equipment, or as a production process for manufacturing large numbers of candles in a variety of sizes and colours. Method Heat the wax in the dipping container to the required temperature.

## Candlemaking

Fill your mold or container with water and empty it out into a measuring jug or cylinder. Water weighs the same as its volume in metric, so you could also weigh it in grams. Once you have this measurement, subtract 20% and this will be exactly how much wax will be needed to fill your mold or container.
