David C. Grove, University of Illinois at Urbana "The Cloud People represents an outstanding example of the power of an integrated historical anthropology. Flannery and Marcus's use of a phylogenetic approach directly and positively influenced my own work in Oceania and should appeal to anyone who is interested in the holistic methods of historical anthropology.

A case study in the divergent evolution of Mexico's Zapotec and Mixtec civilizations, this collection has become a basic resource in the literature of Mesoamerican prehistory and has been widely cited by scholars working on divergent evolution in other parts of the world. Originally published by Academic Press in 1983, a new introduction by the editors updates the volume in terms of discoveries made during the subsequent two decades.

This wide-ranging reference provides an overview of the different factors involved in the emergence and change in early urban societies in the Fourth Millennium B.C., including Mesopotamia and Egypt, pre-Shang China, Classic Horizon Central Mexico and the Mayan area, and middle Horizon societies in the Andean region. The contributors examine such factors as centralized storage and redistributive economies, agro-managerial models, mercantile network control, and conflict and conquest. The coverage emphasizes specific archaeological data useful in theoretical construction.

"Articles review Spores' contributions to Mixtec archaeology, ethnohistory, and ethnology. Other topics include archaeological theory, the colonial period, Xaltocân, Cholula, codex-style vessel from Nochixtlan, Codex Selden, irrigation in Mixtec cacicazgos and Cuicatlan, Mixtec cacicazgos organization, Spanish conquest of Oaxaca,

Zapotec inauguration, and Tehuantepec barrio organization"--Handbook of Latin American Studies, v. 57.

Monte Albán was the capital of the Valley of Oaxaca, Mexico, ca. 500 B.C.¿A.D. 600, but once its control began to wane, other sites filled the political vacuum. Archaeologists have long awaited a meticulous excavation of one of these sites¿which would help us better understand the process that transformed second-tier sites into a series of polities or señoríos that competed with each other for centuries. This new book reports in detail on Ronald Fauseit's excavations at the site of Dainzú-Macuixóchitl in the Valley of Oaxaca. His 2007¿2010 mapping and excavation seasons focused on the Late Classic (A.D. 600¿900) and Early Postclassic (A.D. 900¿1300). The spatial distributions of surface artifacts¿collected during the intensive mapping and systematic surface collecting¿on residential terraces at Cerro Danush are analyzed to evaluate evidence for craft production, ritual, and abandonment at the community level. This community analysis is complemented by data from the comprehensive excavation of a residential terrace, which documents diachronic patterns of behavior at the household level. The results from Fauseit¿s survey and excavations are evaluated within the theoretical frameworks of political cycling and resilience theory. Fauseit concludes that resilient social structures may have helped orchestrate reorganization in the dynamic political landscape of Oaxaca after the political collapse of Monte Albán.

This volume¿the fourteenth in the monograph series on the prehistory and human ecology of the Valley of Oaxaca, Mexico¿focuses on Cerro Tilcajete, a secondary administrative center below Monte Albán, the capital of the prehispanic Zapotec state. After defeating the Tilcajete

Download Free The Cloud People Divergent Evolution Of The Zapotec And Mixtec

region, Monte Albán created a new administrative center for the Ocatlán region: Cerro Tilcajete. Elson's excavations at the Period II center showed that, in contrast to San José Mogote, Cerro Tilcajete was a newly created regional center rather than a reoccupation of an earlier site, and documented the nature of Cerro Tilcajete's ties to Monte Albán, especially the links between the elite families at the capital and those at Cerro Tilcajete. Elson deftly moves us away from the top-down, capital-centric focus, and in so doing, gives us new insights into secondary administrative centers in a pristine state.

""Zapotec is one of the major hieroglyphic writing systems of ancient Mesoamerica. This volume explains the origins and spread of Zapotec writing, the role of Zapotec writing in the changing political agendas of the region, and the decline of hieroglyphic writing in the Valley of Oaxaca."--Provided by publisher"--

Mesoamerica has become one of the most important areas for research into the emergence of complex human societies. Between 10,000 years ago and the arrival of the Spanish in 1521, some very significant changes in the evolution of human societies occurred. In this revised and updated edition of a book first published in 1981, the authors synthesize recent research, focusing on three intensively studied regions, the Valleys of Oaxaca and Mexico and the Maya lowlands. A theoretical framework of ideas is developed to explain long-term change in complex societies.

"This volume grew out of the 1987 meeting of the Northeast Mesoamericanists Society, held at the University of
