Neil Postman was a University Professor, the Paulette Goddard Chair of Media Ecology, and the chair of the Department of Media, Culture, and Communication, all at New York University. Among his 20 books are studies of childhood (The Disappearance of... More about Neil Postman

The Disappearance of Childhood by Neil Postman ...

In this book, Neil Postman argues that (a) childhood is a social construct, not a biological fact and (b) childhood is disappearing because of television and modernity in general. The former is debatable but defensible (his exclusive focus on Europe/America leaves significant holes in his argument), but the latter is just ridiculous.

The Disappearance of Childhood (Vintage)

In Neil Postman In The Disappearance of Childhood (1982), Postman claimed that childhood is essentially a social artifact. Its origin was closely linked to the printing press and the growth of literacy, which made possible the segregation of groups into children and adults. Television, however, tends to eliminate the...

The Disappearance of Childhood: Postman, Neil ...

There is an argument that childhood as we know is disappearing with the the distinction between adulthood and childhood is narrowing. Neil Postman (1994) argued that childhood is ‘ disappearing at a dazzling speed ’ . As supporting evidence he looked at the trend towards giving children the same rights as adults, the growing similarity of adult and children ’ s clothing and even cases of children committing ‘ adult crimes ’ (murder, rape).

Is Childhood Disappearing? – ReviseSociology

THE DISAPPEARANCE OF CHILDHOOD. by Neil Postman RELEASE DATE: Sept. 1, 1982.

Postman has swung dogmatically from Teaching as a Subversive Activity (1969) to Teaching as a Conserving Activity (1979) and landed, now, in the coils of social history. His simple, endlessly elaborated theme: ""the symbolic area in which a society conducts itself will either make childhood necessary or irrelevant."".

The disappearance of childhood (Book, 1994) [WorldCat.org]

Neil Postman (March 8, 1931 – October 5, 2003) was an American author, educator, media theorist and cultural critic, who eschewed technology, including personal computers in school and cruise control in cars, and is best known for twenty books regarding technology and education, including *Amusing Ourselves to Death* (1985), *Conscientious Objections* (1988), *Technopoly: The Surrender of Culture* ...

From the vogue for nubile models to the explosion in the juvenile crime rate, this modern classic of social history and media traces the precipitous decline of childhood in America today – and the corresponding threat to the notion of adulthood. Deftly marshaling a vast array of historical and demographic research, Neil Postman, author of *Technopoly*, suggests that childhood is a relatively recent invention, which came into being as the new medium of print imposed divisions between children and adults. But now these divisions are eroding under the barrage of television, which turns the adult secrets of sex and violence into popular entertainment and pitches both news and advertising at the intellectual level of ten-year-olds. Informative, alarming, and aphoristic, *The Disappearance of Childhood* is a triumph of history and prophecy.

Argues that the intrusion of television into every home introduces children too early to adult concepts and activities and subverts their ability to think abstractly, and the very concept of childhood is being destroyed

In this comprehensive response to the education crisis, the author of *Teaching as a Subversive Activity* returns to the subject that established his reputation as one of our most insightful social critics. Postman presents useful models with which schools can restore a sense of purpose, tolerance, and a respect for learning.

In a series of feisty and ultimately hopeful essays, one of America's sharpest social critics casts a shrewd eye over contemporary culture to reveal the worst -- and the best -- of our habits of discourse, tendencies in education, and obsessions with technological novelty. Readers will find themselves rethinking many of their bedrock assumptions: Should education transmit culture or defend us against it? Is technological innovation progress or a peculiarly American addiction? When everyone watches the same television programs -- and television producers don't discriminate between the audiences for *Sesame Street* and *Dynasty* -- is childhood anything more than a sentimental concept? Writing in the traditions of Orwell and H.L. Mencken, Neil

Postman sends shock waves of wit and critical intelligence through the cultural wasteland.

At a time when we are reexamining our values, reeling from the pace of change, witnessing the clash between good instincts and "pragmatism," dealing with the angst of a new millennium, Neil Postman, one of our most distinguished observers of contemporary society, provides for us a source of guidance and inspiration. In *Building a Bridge to the Eighteenth Century* he revisits the Enlightenment, that great flowering of ideas that provided a humane direction for the future -- ideas that formed our nation and that we would do well to embrace anew. He turns our attention to Goethe, Voltaire, Rousseau, Diderot, Kant, Edward Gibbon, Adam Smith, Thomas Paine, Jefferson, and Franklin, and to their then-radical thinking about inductive science, religious and political freedom, popular education, rational commerce, the nation-state, progress, and happiness. Postman calls for a future connected to traditions that provide sane authority and meaningful purpose -- as opposed to an overreliance on technology and an increasing disregard for the lessons of history. And he argues passionately for specific new guidelines in the education of our children, with renewed emphasis on developing the intellect as successfully as we are developing a computer-driven world. Witty, provocative, and brilliantly reasoned, *Building a Bridge to the Eighteenth Century* is Neil Postman's most radical, and most commonsensical, book yet.

In this book Chris Jenks looks at what the ways in which we construct our image of childhood can tell us about ourselves. After a general discussion of the social construction of childhood, the book is structured around three examples of the way the image of the child is played out in society: the history of childhood from medieval times through the enlightenment 'discovery' of childhood to the present the mythology and reality of child abuse and society's response to it the 'death' of childhood in cases such as the James Bulger murder in which the child itself becomes the perpetrator of evil. Part of the highly successful Key Ideas series, this book gives students a concise, provocative insight into some of the controlling concepts of our culture.

Examines the effects of television culture on how we conduct our public affairs and how "entertainment values" corrupt the way we think.

*The End of American Childhood* takes a sweeping look at the history of American childhood and parenting, from the nation's founding to the present day. Renowned historian Paula Fass shows how, since the beginning of the American republic, independence, self-definition, and individual success have informed Americans' attitudes toward children. But as parents today hover over every detail of their children's lives, are the qualities that once made American childhood special still desired or possible? Placing the experiences of children and parents against the backdrop of social, political, and cultural shifts, Fass challenges Americans to reconnect with the beliefs that set the American understanding of childhood apart from the rest of the world. Fass examines how freer relationships between American children and parents transformed the national culture, altered generational relationships among immigrants, helped create a new science of child development, and promoted a revolution in modern schooling. She looks at the childhoods of icons including Margaret Mead and Ulysses S. Grant—who, as an eleven-year-old, was in charge of his father's fields and explored his rural Ohio countryside. Fass also features less well-known children like ten-year-old Rose Cohen, who worked in the drudgery of nineteenth-century factories. Bringing readers into the present, Fass argues that current American conditions and policies have made adolescence socially irrelevant and altered children's road to maturity, while parental oversight threatens children's competence and initiative. Showing how American parenting has been firmly linked to historical changes, *The End of American Childhood* considers what implications this might hold for the nation's future.
