As discussed in our previous work (Cho, Martin, MacDonald, Margrett, & Poon, 2011), the sampling frame of the Georgia Centenarian Study (GCS, Phase III; Poon et al., 2007) comprised two strategies. The first strategy was to obtain information about all skilled nursing facilities and personal care homes and to identify all individuals 98 years and older residing in those facilities covering a 44 county area in northern Georgia.

Successful Aging and Subjective Well-Being Among Oldest ...

As discussed in our previous work , the sampling frame of the Georgia Centenarian Study (GCS, Phase III) , which provides data for this study, had two components. The first one was to identify the proportion of all residents of skilled nursing facilities (SNFs) and personal care homes (PCHs) in a 44-county area in northern Georgia.
