In A Brief History of the World, you'll survey the expanse of human development and civilization across the globe. Over the course of 36 riveting lectures, you'll apprehend "the big picture" of world history from the invention of agriculture in the Neolithic era to the urbanized, technologically sophisticated world of the 21st century.

A Brief History of the World

When diplomats met to form the United Nations in 1945, one of the things they discussed was setting up a global health organization. WHO's Constitution came into force on 7 April 1948 - a date we now celebrate every year as World Health Day.

Presents a journey along the timeline of history, noting the birthdays of 150 people in the Who Was? biography series and what was happening in the world at that moment in time. Follow the timeline to learn who was doing what when, from the days of ancient Egypt all the way up to the present.

Take a trip through the defining moments of our global story and see the thinkers, leaders, ideas, and inventions that have shaped the world. Presented in a beautiful slipcase, World History is an essential guide for anyone who loves history or wants to broaden their knowledge. This accessible book covers over 350 of the world's most important turning points, from our earliest human ancestors of prehistory to political events of the modern world. Follow detailed maps showing the continuous movement of humans across the Earth, and examine fascinating paintings illustrating the events and individuals that took them there. Beautiful photography throughout the book will carry you back in time to see the people and places of the stories - along with stunning artifacts from every historical period. From magnificent buildings like the Colosseum to magnificent words like "I have a dream!", this guide brings history's most significant events to life for every reader to discover and enjoy.

Discover how humans created their world from the objects they left behind - from the US Constitution to the first iPhone - in DK's latest history book. From the beginning of human history, the one thing that has defined us is our talent for making things, from basic technology and everyday objects, such as bowls and hand axes, to high-tech inventions, such as supersonic aircraft, smart devices, and Mars rovers. Objects speak volumes about a civilization, telling us how our ancestors lived - as well as what they believed in and valued. A bronze cat mummy shows us how highly the ancient Egyptians valued their feline companions, while a mechanical tiger toy tells the story

of rising tensions between an Indian sultan and European colonizers. With stunning, exclusive photography, *History of the World in 1000 Objects* shows you the objects that our ancestors treasured - from the jewelry worn by the Mesopotamians to the prized ritual vessels used by the people of the Shang Dynasty - and gives you insight into what gave each culture its own identity. From astrolabes and airplanes to vacuum cleaners and X-rays, DK uses its hallmark visual style to weave the extraordinary legacy of our creativity into a unique view of world history that will change the way you see the objects all around us.

E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

History is a rich, varied and fascinating subject, so it's rare to find the whole lot in one book ... until now. *The History of the World in Bite-Sized Chunks* pulls it all together, from the world's earliest civilizations in 3500 BC to the founding of the United Nations in 1945, passing by the likes of Charlemagne, the Ottoman Empire and the Crimean War, to name a few. Here's your chance to introduce yourself to the full spectrum of world history, and discover just how the modern world came to be.

Fresh, exciting and vividly readable, this is popular history at its very best. Our understanding of world history is changing, as new discoveries are made on all the continents and old prejudices are being challenged. In this truly global journey Andrew Marr revisits some of the traditional epic stories, from classical Greece and Rome to the rise of Napoleon, but surrounds them with less familiar material, from Peru to the Ukraine, China to the Caribbean. He looks at cultures that have failed and vanished, as well as the origins of today's superpowers, and finds surprising echoes and parallels across vast distances and epochs. *A History of the World* is a book about the great change-makers of history and their times, people such as Cleopatra, Genghis Khan, Galileo and Mao, but it is also a book about

us. For 'the better we understand how rulers lose touch with reality, or why revolutions produce dictators more often than they produce happiness, or why some parts of the world are richer than others, the easier it is to understand our own times.'

A New York Times Bestseller "Maps allow the armchair traveler to roam the world, the diplomat to argue his points, the ruler to administer his country, the warrior to plan his campaigns and the propagandist to boost his cause... rich and beautiful." - Wall Street Journal Throughout history, maps have been fundamental in shaping our view of the world, and our place in it. But far from being purely scientific objects, maps of the world are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the world, they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps - from the almost mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly individual view of the world. Brotton shows how each of his maps both influenced and reflected contemporary events and how, by considering it in all its nuances and omissions, we can better understand the world that produced it. Although the way we map our surroundings is more precise than ever before, Brotton argues that maps today are no more definitive or objective than they have ever been. Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again. "A fascinating and panoramic new history of the cartographer's art." - The Guardian "The intellectual background to these images is conveyed with beguiling erudition... There is nothing more subversive than a map." - The Spectator "A mesmerizing and beautifully illustrated book." -The Telegraph

Journey through a mammoth timeline, richly illustrated with over 1,500 photos, maps, and illustrations. Written in association with the esteemed Smithsonian Institution. A beautiful visual reference book with key events of world history, written in an elementary language for budding historians. Take a step back in time! - 6.5 MYA - 3000 BCE Before History Began - 3000 BCE - 700 BCE Really Ancient History - 700 BCE - 500 CE Much More Civilization - 500 - 1450 The Marvelous Middle Ages - 1450 - 1750 Exploring and Reforming - 1750 - 1850 Time for Change - 1850 - 1945 Empires and World Wars - 1945 - Present Fast Forward

In this monumental book, Chris Harman achieves the impossible—a gripping history of the planet from the perspective of the struggling people throughout the ages. From earliest human society to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the millennium, Chris Harman provides a brilliant and comprehensive history of the planet. Eschewing the standard histories of 'Great Men,' of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of 'history from below.' In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these changes. While many pundits see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history never ends. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical change.
