I met Bob Doroghazi when he dropped the first draft of his manuscript of The Physician's Guide to Investing: A Practical Approach to Building Wealth at my office. I will have to

admit I was a bit skeptical: a physician writing a book on investments? During that first meeting with Bob, it became evident that he had been a successful physician and a successful investor, so I agreed to take a look at the book. I was in for a pleasant surprise. Bob's manuscript was easy to read and had specific advice useful to physicians, interspersed with lots of practical tidbits for any investor. Having written three college-level finance and investment texts, I was excited to be in on a project aimed at offering practical investment advice to a more general, yet

specialized, audience. I had high expectations for the book and am pleased to say that I believe Bob has delivered a book that every physician interested in building wealth and protecting assets should read. Bob is a straight shooter; he tells it like he sees it in his book. Some doctors might be indignant on reading his statements, such as "Physicians sometimes have no idea of their limitations. This type of arrogance and ego can result in investing disaster." However, if you do have these limitations (and most professionals, even college professors,

do), then reading Bob's book will help you recognize situations in which they can lead to poor investment decisions.

In comments that were unfortunately prescient, Dr. Doroghazi said in the first edition "the author feels we are currently experiencing a real estate bubble." And in anticipation of the credit crisis, he said "banks are far too lenient in their lending practices...the problem is that bankers are often not lending their own money...considering that a significant percentages of mortgages are sold to Fannie Mae (FNM) and Freddie Mac

(FRE), the problem is now actually everyone's." This new and expanded edition provides commonsense advice that all investors, physicians and non-physicians will find profitable in these difficult times. Learn about the power of thrift, the magnificence of compound interest, the malevolence of debt and the perniciousness of fees. See how to pay off the mortgage by age 45, fund your children's education and retire at a reasonable age rather than continue to work because you must.

In medical training, our job is to hone our craft by learning and practicing the best possible medicine for our patients. Unfortunately, medical training isn't free. With the substantial debt burden facing graduating medical students, it has become increasingly important to know how to navigate the choppy waters of personal finance. With sharks in the water, no training on personal finance, and little time to spare on such an important topic, this short primer aims to teach you only what you need to know about

miss the greatest opportunity you'll ever have for growing passive income. As a busy professional, you can still have time to buy and manage a real estate investment--if you know how. It's no different from managing any other business: choose what you can do and hire someone to do the rest. With this book, you'll learn how to oversee a property management company and how to manage dozens of units yourself in less than 15 hours a month. In the fourth book of The Doctors Guide series, Dr. Cory S. Fawcett shows you how he managed five apartment complexes as a full-time surgeon--and what
