Paperback 2011 Author Eibert W Russell

With an emphasis on a scientific approach which includes analysing quantitative data, neuropsychology follows an information processing approach to brain activity using standard assessments to evaluate various mental functions.

## ~~The Scientific Foundation of Neuropsychological Assessment ...~~

Formal neuropsychology is based on science and hence the chapter reviews the nature of science. The essence of science is to demonstrate the existence of knowledge by means of objective observation methods that are repeatable, testable, and verify predictions. There are two forms of science: discovery and justification.
