Three years before the September 11 bombing of the World Trade Center-a Chinese military manual called Unrestricted Warfare touted such an attack-suggesting it would be difficult for the U.S. military to cope with. The events of September 11 were not a random act perpetrated by independent agents. The doctrine of total war outlined in Unrestricted Warfare clearly demonstrates that the People's Republic of China is preparing to confront the United States and our allies by conducting "asymmetrical" or multidimensional attack on almost every aspect of our social, economic and political life.

Unrestricted Warfare reveals the dramatic story of the harsh baptism by fire faced by U.S. submarine commanders in World War II. The first skippers went to battle hamstrung by conservative peacetime training and plagued by defective torpedoes. Drawing extensively from now declassified files, Japanese archives, and the testimony of surviving veterans, James DeRose has written a fascinating account of the men and vessels responsible for the only successful submarine campaign of the war. They clearly charted a new course to victory in the Pacific. ADVANCE PRAISE FOR UNRESTRICTED WARFARE " James DeRose has done an excellent job- surprisingly so, in view of his lack of true WWII submarine experience. He obviously contacted everyone he could find who served on one of the three boats he concentrated on, and he read, as well, everything he could find that was written about them. . . . DeRose shines by his interpretation of events as the Japanese must have seen them. . . . His reconstruction of how Wahoo came to her end may well be pretty close to correct. . . . He does the same with Tang." - CAPTAIN EDWARD L. BEACH, USN author of Submarine! and Run Silent, Run Deep " An outstanding addition to the literature of the Silent Service. . . . The depth of research is wonderful. . . . This is fine history . . . that rivals Blair's Silent Victory." - PAUL CROZIER, sitemaster, " Legends of the Deep" (www.warfish.com) Web site on the USS Wahoo " I knew all of the book's main characters quite well. . . . I am also completely familiar with submarine operations in the Pacific. With that background I couldn't fail to thoroughly enjoy DeRose's book. It is well written and has the right feel." - CHESTER W. NIMITZ JR., rear admiral, USN (Ret.) " Sail with American submariners into tightly guarded Japanese home waters; undergo the horror of a depth charge attack; experience the thrill of victory with some of the U.S. Navy's ace submarine skippers. All this- and much more- is contained in James F. DeRose's compelling Unrestricted Warfare. No one interested in the naval side of World War II should be without it." - NATHAN MILLER author of War at Sea: A Naval History of World War II

" . . . until now how the Navy managed to instantaneously move from the overt legal restrictions of the naval arms treaties that bound submarines to the cruiser rules of the eighteenth century to a declaration of unrestricted submarine warfare against Japan immediately after the attack on Pearl Harbor has never been explained. Lieutenant Holwitt has dissected this process and has created a compelling story of who did what, when, and to whom."-The Submarine Review "Execute against Japan should be required reading for naval officers (especially in submarine wardrooms), as well as for anyone interested in history, policy, or international law."-Adm. James P. Wiscup, President, US Naval War College (for Naval War College Review) "Although the policy of unrestricted air and submarine warfare proved critical to the Pacific war's course, this splendid work is the first comprehensive account of its origins-illustrating that historians have by no means exhausted questions about this conflict."-World War II Magazine "US Navy submarine officer Joel Ira Holwitt has performed an impressive feat with this book. . . . Holwitt is to be commended for not shying away from moral judgments . . . This is a superb book that fully explains how the United States came to adopt a strategy regarded by many as illegal and tantamount to "terror"."-Military Review

2020 Facsimile of the 1999 Edition. Unrestricted Warfare is a book on military strategy written in 1999 by two colonels in the People's Liberation Army. Its primary concern is how a nation such as the People's Republic of China can defeat a technologically superior opponent (such as the United States) through a variety of strategies. Rather than focusing on direct military confrontation, this book instead examines a variety of other means. Such means include using International Law (see Lawfare) and a variety of economic means to place one's opponent in a weakened position and circumvent the need for direct military action. Of the various strategies discussed perhaps the most relevant is that of attacking networks. Networks are increasingly important in not only data exchange but also transportation, financial institutions, and communication. Attacks that disable networks can easily hamstring large areas of life that are dependent on them for coordination. One example of network warfare would be shutting down a network that supplies power. If there is a significant failure in the power grid caused by the attack, massive power outages could result, crippling industry, defense, medicine, and all other areas of life. The English translation of the book was made available by the Foreign Broadcast Information Service in 1999. Errors in translations are the sole responsibility of the Foreign Broadcast Information Service and not of Albatross Publishing.

The US media suggests that Russia poses the greatest threat to America's national security, but retired Air Force Brigadier General Robert Spalding believes the real danger lies further east. While those in power have been distracted and disorderly, Spalding believes China has waged a six-front war on America's economy, military, diplomacy, technology, education, and infrastructure - and they're winning. In Stealth War, Spalding reveals China's motives and secret attacks on the West and how it's still possible for the U.S. to combat China's stealth war.

An introduction to the works of authoritative and innovative Chinese authors whose writings focus on the future of the Chinese military. These carefully selected, representative essays make Chinese military thinking more accessible to western readers. It reveals, for example, China's keen interest in the Revolution in military affairs. This volume is an important starting point for understanding China's future military modernization. "Must reading for every executive of every Western firm doing business in China." "Readers will be impressed by China's ambitions in space, information warfare, stealth, and robots, in future warfare." Photos.

In its fight for global dominance, Communist China has thrown out the old rules of war. China expert General Robert Spalding walks us through their new playbook. Many Americans are finally waking up to the alarming reality of China's stealth war on the United States and puzzling over how to push back against its insidious infiltration. What few realize is that we have one real advantage in this war: the Chinese Communist Party strategy for total war has been written out in Unrestricted Warfare, the Chinese book, well known there, that has become their new Art of War. In War Without Rules, retired Air Force Brigadier General Rob Spalding takes Americans inside Unrestricted Warfare. He walks readers through the principles of this book, revealing the Chinese belief that there is no sector of life outside the realm of war. He shows how the CCP itself has promised to use corporate espionage, global pandemics, and trade violations to achieve dominance. Most importantly, he provides insight into how, once Americans are aware of the tactics, we can fight back against CCP's creeping influence. More than a vital read for those interested in China, War Without Rules is essential reading for anyone-from policymakers and diplomats to businessmen and investors-finally waking up to the stealth war. Knowledge is power, and it's time to arm yourself.

DeRose chronicles the evolution of American submarine tactics from evasion to engagement as begun by Dudley "Mush" Morton aboard the "Wahoo" and continued by officers who apprenticed under him.

Just a few years ago, people spoke of the US as a hyperpower-a titan stalking the world stage with more relative power than any empire in history. Yet as early as 1993, newly-appointed CIA director James Woolsey pointed out that although Western powers had "slain a large dragon" by defeating the Soviet Union in the Cold War, they now faced a "bewildering variety of poisonous snakes." In The Dragons and the Snakes, the eminent soldier-scholar David Kilcullen asks how, and what, opponents of the West have learned during the last quarter-century of conflict. Applying a combination of evolutionary theory and detailed field observation, he explains what happened to the "snakes"-non-state threats including terrorists and guerrillas-and the "dragons"-state-based competitors such as Russia and China. He explores how enemies learn under conditions of conflict, and examines how Western dominance over a very particular, narrowly-defined form of warfare since the Cold War has created a fitness landscape that forces adversaries to adapt in ways that present serious new challenges to America and its allies. Within the world's contemporary conflict zones, Kilcullen argues, state and non-state threats have increasingly come to resemble each other, with states adopting non-state techniques and non-state actors now able to access levels of precision and lethal weapon systems once only available to governments. A counterintuitive look at this new, vastly more complex environment, The Dragons and the Snakes will not only reshape our understanding of the West's enemies' capabilities, but will also show how we can respond given the increasing limits on US power.

One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise - and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream" is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, The Hundred-Year Marathon reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders - as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped - sometimes unwittingly and sometimes deliberately - to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. The Hundred-Year Marathon is a wake-up call as we face the greatest national security challenge of the twenty-first century.
