The most comprehensive and up-to-date catalogue of the Vespa ever compiled, featuring all the models and versions produced to date, listed year by year through a series of files illustrated with invaluable archive materials and accompanied by detailed technical information. Vespa is an overview unique in its completeness and wealth of data, a resource of particular interest to those who still ride Vespas today, to collectors and to all those who have a place in their heart for the Vespa. The celebrated scooter, born at Pontedera in the immediate post-war years inaugurated a new era of personal mobility, taking on diverse roles with the passing of the years: from a vehicle for out-

of-town trips to a symbol of aggregations, from an emblem of freedom to a design icon, from the queen of calendars to a star of competition, without ever losing sight of its primary function, that of the "urban" vehicle par excellence. Over the course of the years, Piaggio has produced dozens of models, from the overtly utilitarian to the most sporting and through to the Vespa Elettrica of today.

The Haynes Service and Repair manual for the Piaggio Vespa Scooter.

Since hitting the road in 1946, eighteen million Vespa motor scooters have buzzed the Earth. Vespa's success lies in the uniqueness of its design -- in the unmistakable sheet metal skin that, over the span of decades, has defined the concept of "motor scooter." The Life Vespa celebrates all aspects of the scooters and the thriving culture that surrounds them. Since Vespa is affordable and in high-style, the life Vespa encompasses all walks of life, from street urchins to celebrities like Audrey Hepburn, John Wayne, and Brad Pitt. Part of Motorbooks ' " Life " series, The Life Vespa melds machine and culture to immerse you in la bella vita.

This is mainly a photographic reference book to classic scooters and microcars with specification data presented in A to Z order of manufacturer. There are also nostalgic recollections by the author based on ownership and personal experience. In the middle 1950s as a teenager Mike Dan became interested in these then newly-arrived forms of transport. Eventually Mike owned a series of scooters and a microcar. He became involved in Scooter and Microcar Clubs and took part in many local and national sporting events gaining a collection of awards and trophies. In the mid 1980s he had time again to visit many indoor and outdoor classic vehicle shows. Eventually this led to a renewed personal involvement in the restoration of a series of over twenty classic scooters and three classic microcars. This highly entertaining book and reference source is therefore written with the authority of a lifetime enthusiast.

Why do we forget about people when we talk about innovation? Innovation has been a popular subject for the last years. Bruce Nussbaum, perhaps exaggerating, said " Innovation died in 2008, killed off by overuse, misuse, narrowness, incrementalism and failure to evolve. It was done by CEOs, consultants, marketers, advertisers and business journalists who degraded and devalued the idea by conflating it with change, technology, design, globalization, trendiness, and anything new. It was done by an obsession with measurement, metrics and maths and a demand for predictability in an unpredictable world. " If so, why another book on innovation? Because it is not one more book on the subject! It is a book that does not talk about innovation, but about people. Is there anything as important as people when innovating? This book describes how to create a true culture of innovation, a culture where innovation is not an objective, but a consequence.
