Note: Weld symbols on the full reference line relates to welds on the near side of the plate being welded. Weld symbols on the dashed line relates to weld on the far side of the plate. If the welds are symmetrical on both sides of the plate the dashed line is omitted.

[Drawing Guide WELD SYMBOLS - V and F](#)

The three weld symbols you see in the drawings above represent a square, fillet and V-groove weld, respectively. The weld symbol may also be placed above the reference line, rather than below it. This placement is important. When the weld symbol hangs below the reference line, it indicates that the weld must be performed on the "arrow side" of the joint. For example, In the next drawing a fillet weld is specified on the arrow side.

Below we see an example of a fillet weld symbol. Fillet weld symbols will ALWAYS have the vertical line of the symbol on the left. The length of the fillet weld, if it is not the entire length of the join, is displayed to right side of the symbol. Intermittent welds are called out using Length and Pitch.
